In the Pippard lecture theatre:

**Back-of-Envelope Physics**

Tuesdays and Fridays 11am

starting Tuesday 3rd May 2005

The aims of this short optional course will be

1. To enhance your essential skills of approximation and estimation.
2. To make connections between the courses you study.
3. To explore an important issue facing society today:
   **Energy** — the physics of energy consumption, energy production, and sustainable energy.

The course will involve significant audience participation.

All are welcome: the course will be aimed at both part III and part II students.

This is not an official course, but the skills will be useful in your career.

David MacKay and others 27 April 2005
