Dasher

b

Information-Efficient Text Entry

Dasher is a text entry system steered by continuous pointing. Powerful text prediction makes writing easy.

Dasher is useful wherever keyboards cannot be used, for example on palmtop computers or for disabled users.

Dasher outputs to other applications through the clipboard, and supports speech synthesis.

- Fun and easy to learn** - Just like driving a car
- Quick** - 39 words per minute with a mouse or 25 with an eye tracker
- Multilingual** - Enter text in any language
- Adaptive** - Dasher learns as you write
- Free software** - Released under the GPL
- Cross platform** - GNU/Linux, Windows, Mac OSX, PocketPC
